Dear Mr. Pauletto:

On September 18, 2000, we received your Notice to conduct milling activities on your INP #1 and INP#2 mill site claims in T. 13 N., R. 13 W., Section 31, Box Elder County, Utah. We have assigned this Notice serial number U-77764. Please refer to this number in any future correspondence.

Your Notice cannot be accepted until you provide this office with the following information:

1. Estimate the total acreage of the area (i.e. egress and ingress access route area, quarry stone work area, scale/truck loading area, unprocessed and processed stone stockpiles area, containment pond area, topsoil stockpile area and portable trailer area ) proposed for milling under this Notice.
2. Will your operations be continuous, seasonal or intermittent? Will you operate on the weekends or the weekdays?
3. List all equipment to be utilized in the area (e.g. hauling, road maintenance, reclamation, etc.).
4. If a containment pond is constructed, what are the dimensions (i.e. length, width and depth)? What would be the height of the containment walls? What type of material would be used for the containment walls? Do you plan on using a liner for the containment pond?
5. You mentioned the trommel requires some water usage. What is the estimated quantity (gallons per day) of water used for a trommel each day ?
6. How many individuals will be working at the site?

## BUREAU OF LAND MANAGEMENT

Salt Lake Field Office  
2370 South 2300 West  
Salt Lake City, Utah 84119

SEP 28 2000

RECEIVED

OCT 03 2000

DIVISION OF  
OIL, GAS AND MINING

7. Provide an estimate of proposed production (e.g. 5,000 tons/ cu. yds. per year). Would there be waste rock produced on site annually? If so, estimate the quantity.
8. Describe the disposal method of waste (unprocessed and processed)rock at the conclusion of operations.
9. What type of stakes/flagging (color) is used at the mill site corners? These markers identify the proposed surface disturbance for cultural and wildlife surveys done by our specialists.
10. Your Notice mentioned a septic system. Please describe your system materials and construction. This septic system must satisfy both State and Box Elder County standard and health requirements. A recommended alternative would be to rent or purchase a portable toilet (e.g. Porta John) to ensure that the portable unit is pumped on a regular basis.
11. Note on a map where the topsoil would be stockpiled for final reclamation.

Please provide this office with the requested information within 30 days of receipt of this letter, or we will consider your Notice to be withdrawn.

Thank you for your cooperation. If you have any questions or require additional information, please feel free to contact Cheryl Martinez of my staff at (801) 977-4371.

Sincerely,

**/S/ MICHAEL G. NELSON**
